Student Safety Norms Analyst (f/m/d)

About us

We are automating one of the last manual steps in engineering: functional safety analysis (FSA). FSA is mandatory in industries, such as rail, automotive, or aerospace. Our vision to enable engineers is EXIST funded and awarded as “Digital Innovation”.

About you

Task

- Analyze safety-relevant norms
- Compare safety-relevant norms across industries
- Interview practitioners and experts

Your Profile

- Startup mindset and hands-on spirit
- Preferably mechanical or electrical engineering background
- First working experience is an advantage
- Independent, structured, and analytical working style
- English proficiency
